

### **Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the subject application.

### **Listing of Claims:**

1-10. (canceled)

11. (currently amended) A plug connector arrangement, comprising:

a fixed housing having ~~a latching element and a cam projection~~projections;

a moveable housing having ~~an~~two actuation slide means, each of the actuation slide means has~~a~~having ramp-like grooves that receives~~receive~~ the cam ~~projection~~projections to actuate the moveable housing toward the fixed housing and into engagement therewith, each of the actuation slide means having a toothed rack with which a pinion region of a pivotal lever engages in order to displace the actuation slide means, the at least two actuation slide means being of mirror-symmetrical construction and being displaceable in the same direction; and  
resilient latching hooks integrally formed with the actuation slide means on free ends of cut-out spring arms, the resilient latching hooks being arranged at an introductory region of the ramp-like grooves and projecting into the ramp-like grooves, a latching device which the resilient latching hooks co-operate~~geo-operates~~ with the ~~latching element~~cam projections to hold the moveable housing in position relative to the fixed housing before actuation.

12-16. (canceled)

17. (currently amended) The plug connector arrangement of claim 11, wherein each of the ramp-like grooves is formed as a web integrally formed on a surface of the actuation slide means.

18. (canceled)

19. (currently amended) The plug connector arrangement of claim 11, wherein the actuation slide means ~~is~~are displaceable in a direction transverse to a direction of movement of the moveable housing toward the fixed housing.

20. (currently amended) The plug connector arrangement of claim 19, wherein the resilient latching device hooks ~~are~~is movable substantially parallel to the direction of displacement of the actuation slide means.

21. (canceled)

22. (original) The plug connector arrangement of claim 11, wherein the moveable housing is a socket housing having receptacle contacts and the fixed housing is a plug housing having pluggable contacts.

23-25. (canceled)
